Office Action Summary

Application No. 10/027,038

Applicant(s)

Quirk

Examiner

Michael Borin

Art Unit **1631**

The MAILING DATE of this communication appears on the cover sheet with the correspondence address	
Period for Reply	
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.	
- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the	
mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).	
Status	
1) Responsive to communication(s) filed on	
2a) ☐ This action is FINAL . 2b) ☑ This action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11; 453 O.G. 213.	
Disposition of Claims	
4) X Claim(s) 1-41 is/are pending in the application.	
4a) Of the above, claim(s) is/are withdrawn from consideration	io
5) Claim(s) is/are allowed.	
6) Claim(s) is/are rejected.	
7) Claim(s) is/are objected to.	
8) 💢 Claims 1-41 are subject to restriction and/or election requirem	ient
Application Papers	
9) The specification is objected to by the Examiner.	
10) The drawing(s) filed on is/are a accepted or b objected to by the Examiner.	
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).	
11) The proposed drawing correction filed on is: aD approved bD disapproved by the Exam	ine
If approved, corrected drawings are required in reply to this Office action.	
12) The oath or declaration is objected to by the Examiner.	
Priority under 35 U.S.C. §§ 119 and 120	
13) Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).	
a) All b) Some* c) None of:	
1. Certified copies of the priority documents have been received.	
2. Certified copies of the priority documents have been received in Application No	
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).	
*See the attached detailed Office action for a list of the certified copies not received.	
14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).	
a) The translation of the foreign language provisional application has been received.	
15) Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.	
Attachment(s)	
1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413) Paper No(s).	
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) Notice of Informal Patent Application (PTO-152)	1.
3) Information Disclosure Statement(s) (PTO-1449) Paper No(s)	

Art Unit: 1631

Part III DETAILED ACTION

Claims 1-41 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- ١. Claims 1-9, drawn to polypeptide, classified in class 530, subclass 350.
- 11. Claims 10-13, drawn to nucleic acid, classified in class 536, subclass 23.1
- Claims 14-28, drawn to peptide conjugate, classified in class 424, III. subclass 94.3.
- IV. Claims 29-35, drawn to method for searching polypeptides, classified in class 702, subclass 23.
- V. Claims 36-41, drawn to computer-based system, classified in class 364, subclass 528.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are separate and distinct because the inventions are directed to different chemical types regarding the critical limitations therein. For Group I, the Art Unit: 1631

critical feature is a polypeptide whereas for Group II the critical feature is a polynucleotide. It is acknowledged that various processing steps may cause a polypeptide of group I to be directed as to its synthesis by a polynucleotide of Group II, however, the completely separate chemical types of the inventions of Groups I and II supports the undue search burden if both were examined together. Additionally, polypeptides have been most commonly, albeit not always, separately characterized and published in the Biochemical literature, thus significantly adding to the search burden if examiner together, as compared to being searched separately.

Inventions I and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the polypeptide of Group I is deemed to be useful as biologically active or for generation of antibodies, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated

Serial Number: 10/027038

Art Unit: 1631

by the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Method of Group IV is unrelated to products of Groups I-III because it does not

Page 4

utilize said products.

System of Group V is unrelated to either products of Groups I-III or method of

Group IV, because it neither utilizes products I-III, nor implements method of Group

IV.

Sequence Election Requirement Applicable to Groups I-III

In addition, if Groups I, II or III are elected, further restriction of patentably

distinct products is required: each Group detailed above reads on a plurality of

independent and/or patentably distinct sequences. Each peptide or nucleic acid

sequence is independent and/or patentably distinct because they are unrelated

compounds, there is no disclosed core structure required for a common utility, and

because each of these compounds possess different structure and/or physico-

chemical properties, and/or capable of separate manufacture and/or use. For an

Serial Number: 10/027038

Art Unit: 1631

elected Group the Applicants must further elect a single amino acid or nucleic acid

sequence.

MPEP 803.04 states:

Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct

invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

Examination will be restricted only to a Group drawn to elected sequence.

Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one

Page 6

Serial Number: 10/027038

Art Unit: 1631

claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee

required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael Borin whose telephone number is (703)

305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to

5:00 P.M. EST Monday to Friday. If attempts to reach the examiner by telephone

are unsuccessful, the examiner's supervisor Mr. Michael Woodward, can be reached

at (703) 308-4028. The fax telephone number for this group is (703) 305-3014.

Any inquiry of a general nature or relating the status of this application should

be directed to the Group receptionist whose telephone number is (703) 308-0196.

MICHAEL BORIN, AND PRIMARY EXAMINER
